

Inor Fresh Driver App - Complete Business Workflow

Day 1 - Order Collection

Retailers place orders through the Retailer App, WhatsApp, phone calls, or sales executives. All orders are entered into the ERP before the cut-off time. The Warehouse Head reviews total orders, locations, quantities, and vehicle capacity, then creates delivery routes.

Warehouse Route Planning

A minimum of 10 retailers are assigned per vehicle. Routes are optimized and assigned to drivers the previous night.

Driver Login & Authentication

Mobile OTP login, assigned vehicle details, assigned route, and day-wise orders.

Loading Verification

Driver verifies fish stock, ice, crates, and packaging materials before dispatch. Warehouse supervisor confirms loading.

Route Dashboard

Displays retailer name, address, contact number, invoice amount, payment status, order weight, and stop sequence.

Delivery Process

Driver arrives at retailer location, records GPS and arrival time, and delivers products.

Delivery Confirmation

Confirmation through OTP or digital signature. ERP, inventory, and retailer systems update automatically.

Payment Collection

Supports cash, UPI, and bank transfer. Driver uploads proof and accounts are updated instantly.

Damage & Return Management

Capture return reason, upload photos, enter return quantity, and classify as replacement, credit note, or warehouse return.

Return Material Collection

Track fish crates, ice boxes, thermocol boxes, and other returnable assets.

Live Route Monitoring

Warehouse team monitors route completion, vehicle location, delays, and route deviations.

Cold Chain Monitoring

System records loading time, dispatch time, delivery time, and total transit duration.

Warehouse Return Process

Driver returns with collected materials and returned products for reconciliation.

Daily Closing Report

Auto-generated report showing deliveries, collections, returns, damages, route completion, distance traveled, and sales value.

ERP Integration Flow

Retailer Order → ERP → Route Planning → Invoice Generation → Driver Assignment → Delivery Tracking → Payment Collection → Returns → Warehouse Reconciliation → Daily Reports.

Strategic Benefits

Reduces delivery leakage, improves cold-chain compliance, tracks assets, improves cash collection, and provides end-to-end seafood supply chain visibility.
